VKV HEALTHCARE INSTITUTIONS

AMERICAN HOSPITAL

Thanks to digital transformations in health, at the American Hospital, a center of mastery and excellence with 100 years of accumulated knowledge and experience, we always prioritize the patient offering personalized, high quality, and “360 degrees” inclusive (physical, mental, and spiritual) healthcare services.

MEDAMERICAN AMBULATORY CARE CENTER

We are a health and well-being center that offers customized boutique health services reflecting American Hospital’s high-quality service standards from outpatient diagnosis, through treatment and outpatient surgery.

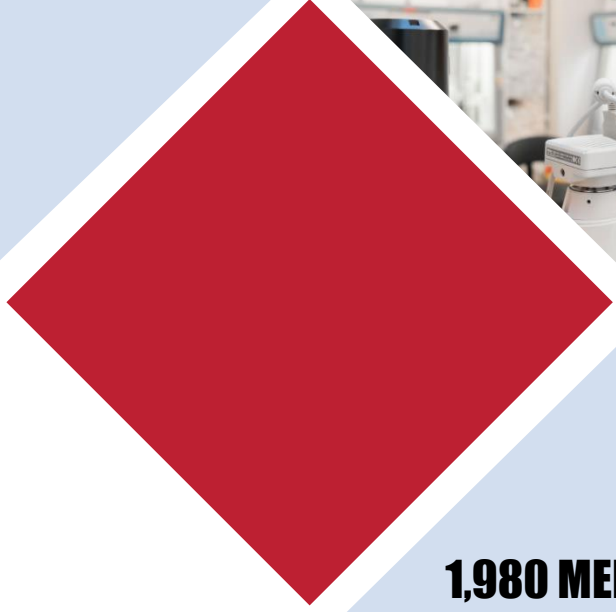

BODRUM AMERICAN HOSPITAL

The American Hospital group has 100 years of unparalleled experience and vision, as well as exemplary, knowledgeable, and skilled staff; The Bodrum American Hospital as the American Hospital's base in the Aegean region encapsulates these same qualities. Besides our success in the healthcare sector, our 'Museum Hospital 'broke new ground in culture and arts.

KOÇ UNIVERSITY HOSPITAL

At Koç University Hospital, we placed the research laboratories and clinical research unit at the heart/center of the hospital. At Koç University Hospital, we host the clinical education, practice, and research processes of Koç University School of Medicine and Koç University School of Nursing with the mission of increasing the number of qualified healthcare workers in Turkey.

1,980 MEDICAL STAFF
2,546 ADMINISTRATIVE STAFF

**MULTIDISCIPLINARY

**MORE THAN 500,000
PATIENTS CARED FOR
EVERY YEAR**

**KOÇ UNIVERSITY
HOSPITAL**

Our Mission

To maintain our position as a leading university hospital by continuing to educate and train innovative individuals who demonstrate a strong ethical approach and respect basic human values. We aim to constantly improve the way we utilize contemporary information and technology and lead the way in the healthcare sector through the ongoing provision of high-quality education, training, research, and development as well as deliver international standard healthcare services with our clinical area.

Our Vision

To maintain our respectability in the healthcare sector and to be the leading university hospital in the world by constantly improving the quality of the education, research, and healthcare services that we provide through our highly professional, academically qualified medical staff.

Our Values

- Patient safety
- Efficient and high-quality patient care and treatment
- Respect for ethical values, science, and innovation, as well as a collective determination to continuously improve in all our practices
- To be an international reference center for research, education, and healthcare services
- Measurable and reviewable system
- Professional development and continuing education opportunities for our staff.
- To be reliable and transparent in the education and healthcare services we deliver, and to ensure continuity

HISTORY

Following the decision of establishing Koç University Health Sciences Campus in 2008, the functional area studies of the campus were completed in 2010.

After Koç University Hospital Health Campus Architectural design was agreed in 2011, the construction permit was approved in 2012 and the foundation was laid. With its innovative approach and dynamic team at North American standards, the Health Sciences Campus aims to contribute to the creation of qualified human resources in the health sector.

Koç University Hospital started to operate as Koç University's training and research hospital in September 2014. Rahmi M. Koç Advanced Interventional Medicine, Training and Simulation Center and Koç University Translational Medicine Research Center were launched in 2017, right after the Nursing faculty area was handed over to the Health campus in 2016.

The architectural design of Koç University Hospital reflects the approach of patient care and treatment. In line with the adopted transparency principle, glass has been widely used in interior design on the condition of protecting the privacy of patients. Due to the emphasis placed on research, research laboratories are located at the center of the hospital complex. In addition, spatial distinctions between disciplines and departments are avoided, thus, it is aimed to establish a holistic system that complements, interrogates and acts within a team spirit in clinical practices.

WHY KOÇ UNIVERSITY HOSPITAL

Future Vision

We aim to provide the most up-to-date diagnosis and treatment services by creating **patient-specific treatment** algorithms, healthy digital transformation, a **multi-disciplinary approach**, and **cutting-edge clinical research**.

Leadership in Clinical Research and Education

In order to make qualified and innovative contributions to universal science, our faculty members involved in independent research, recognize the importance of **interdisciplinary cooperation**.

Our Centers

With a total of **13 centers within our institution**, we aim to increase patient satisfaction by adopting a **multidisciplinary treatment approach**.

Our Departments

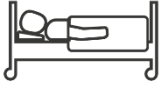

Our 50 departments, each of which boasts **experienced, specialist physicians and healthcare staff**, practice the most up-to-date approaches in the field of medicine and the latest technologies.

● OUR SPECIAL ● TECHNOLOGIES

OUR SPECIAL TECHNOLOGIES

Robotic Surgery – Da Vinci IS 4000

It offers 3D high-definition vision and advanced surgical tools.

Versa HD – Linear Accelerator

Versa HD is designed to provide techniques that provide maximum accuracy in tumor targeting and protection of critical structures. The Versa HD utilizes the Agility 160 leaf multi-leaf collimating system, which allows for precision shaping of the beam when targeting the treatment area, reducing the risk of damage to healthy organs.

Versa HD provides custom configurations for unique clinical needs and highly conformal beam shaping — a critical requirement for optimizing target precision, while also preserving surrounding healthy tissues.

**KOÇ UNIVERSITY
HOSPITAL**

OUR SPECIAL TECHNOLOGIES

Elekta Gamma Knife® Icon™

Leksell Gamma Knife Icon, with nearly 50 years of experience, radically broadens both the techniques and the scope of treatments; It provides clinicians with the option to perform single or fractionated frame-based or frameless treatments, allowing for more individualized delivery without sacrificing precision and accuracy.

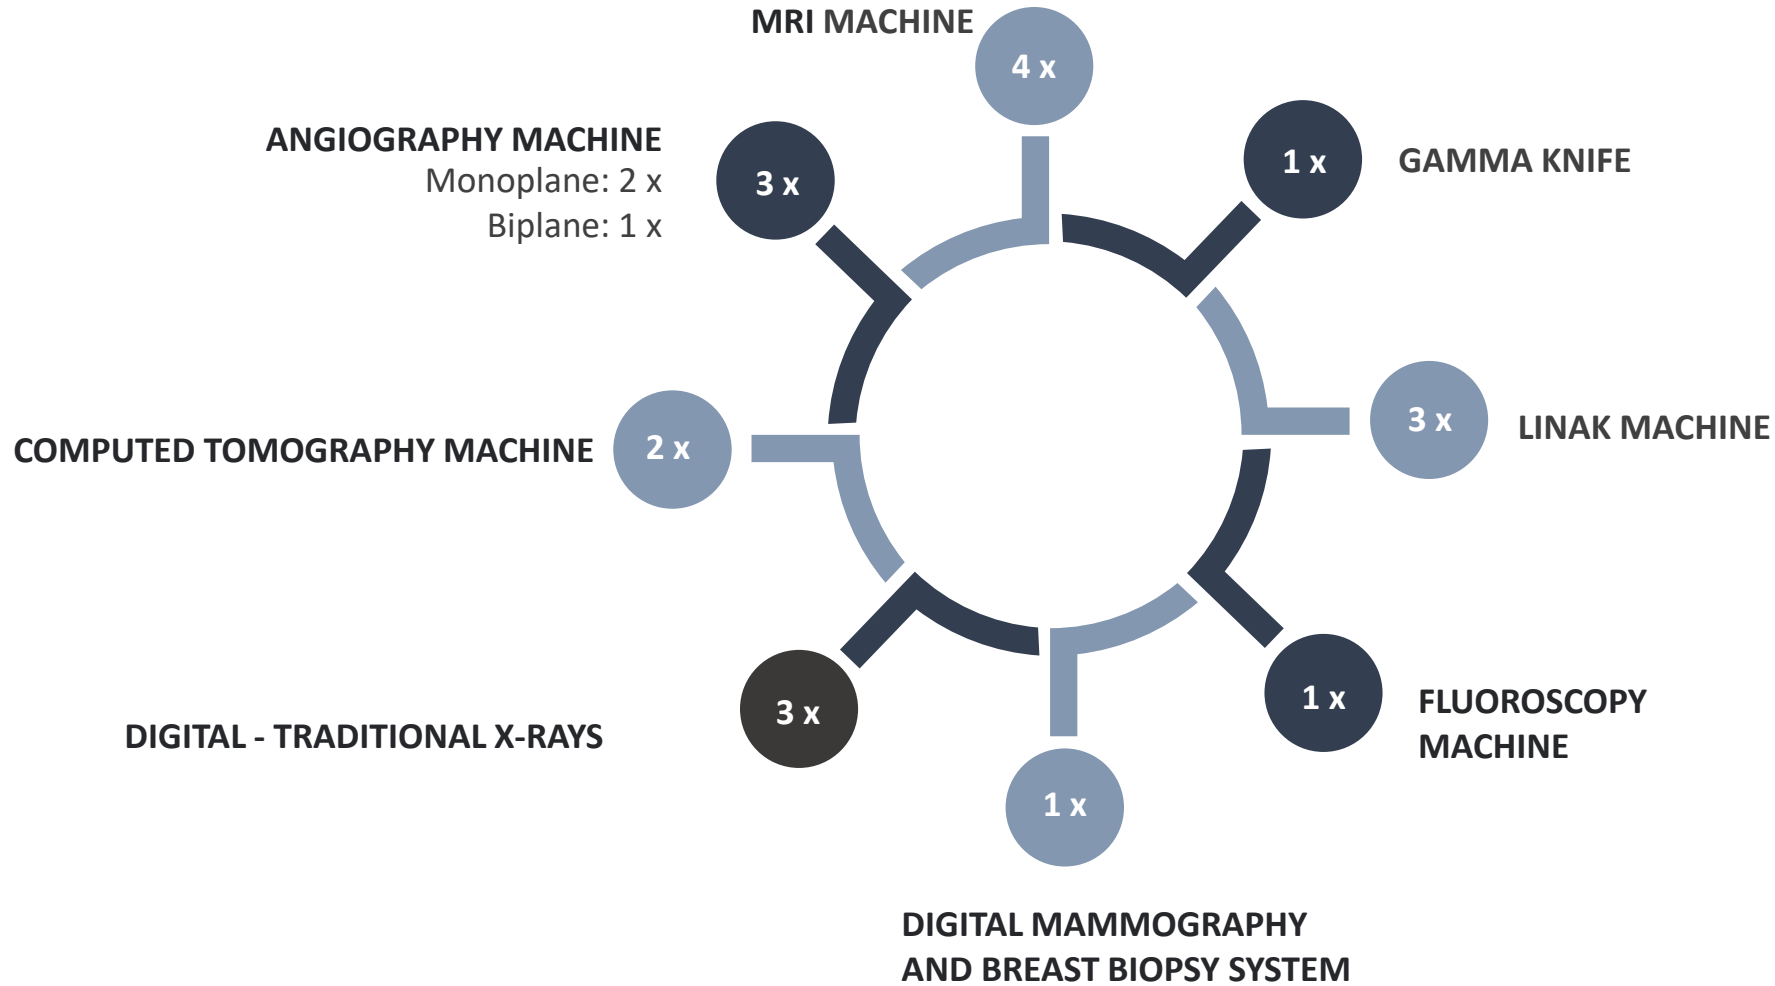

Undersea and Hyperbaric Oxygen Therapy Center

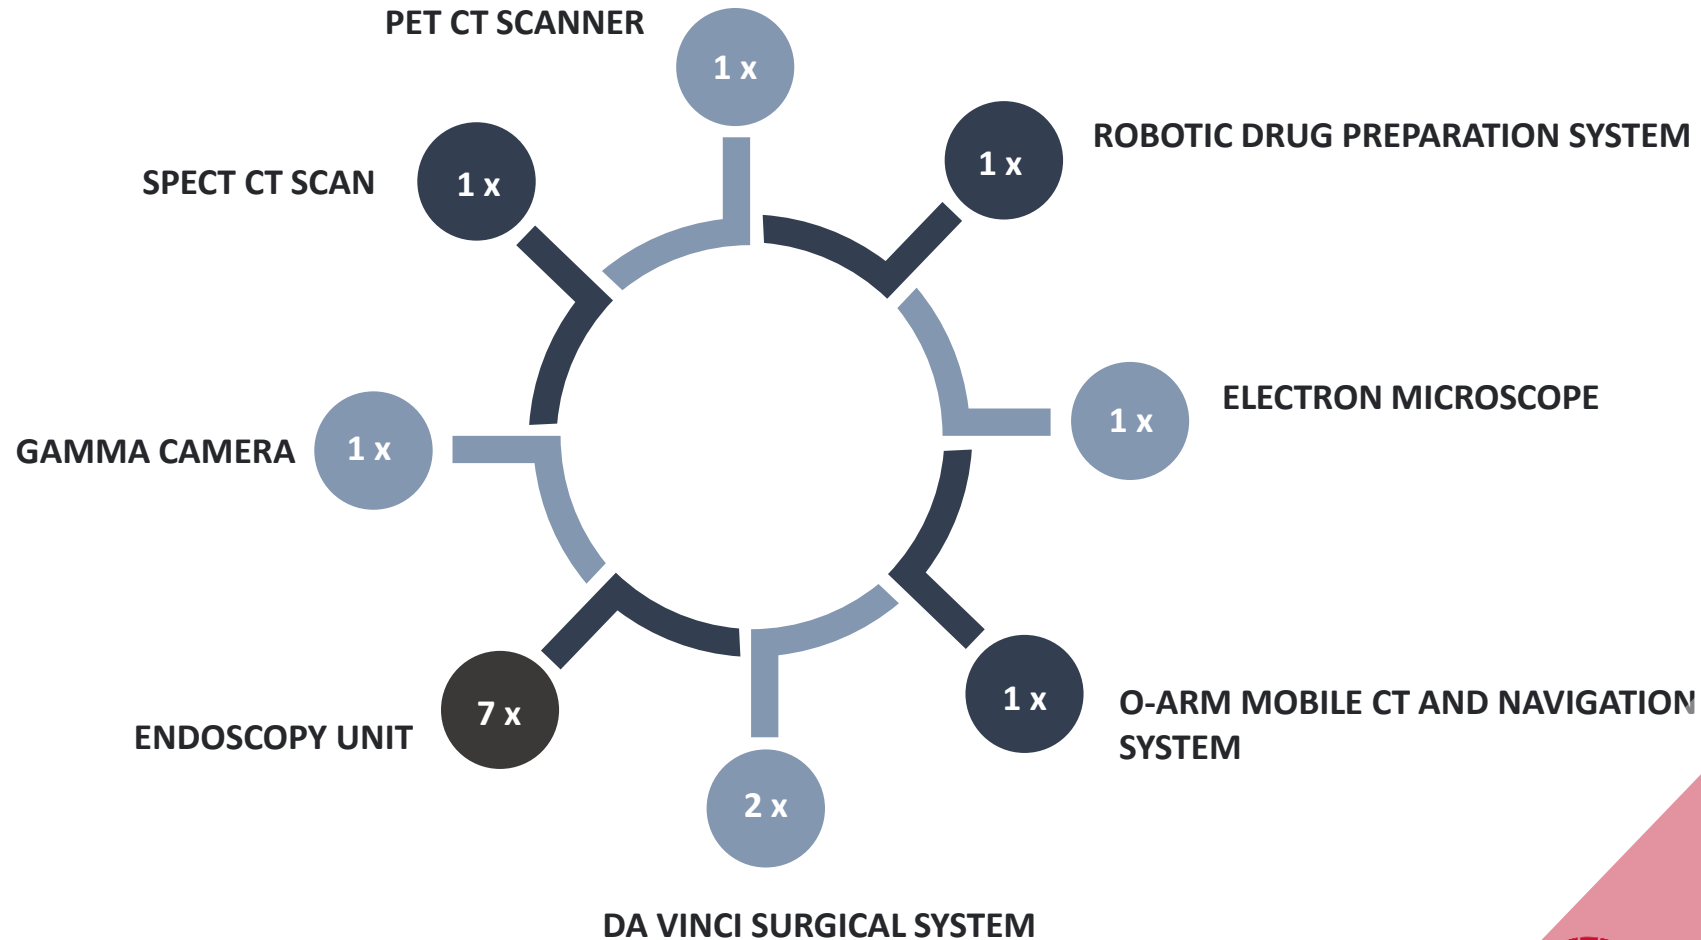

Hyperbaric oxygen (HBO2) therapy is a specific healing method patients breathe near 100% oxygen intermittently while inside a hyperbaric chamber that is pressurized to greater than sea level pressure (1 atmosphere absolute, or ATA).

HBOT (Hyperbaric oxygen therapy) is applied for conditions that require oxygen for treatment; diabetic wounds that are not healing properly, bone infections (osteomyelitis), delayed radiation injuries, burns, and when patients have gas bubbles trapped inside a blood vessel.

OUR SOCIAL RESPONSIBILITY PROJECTS

Health Starts with Hands

With the “Health Begins in the Hand” Project, which was implemented in cooperation with Koç University Hospital and Zeytinburnu Municipality, we continue to raise children’s awareness of the importance of cleaning hands and nails correctly. We aim to reach more than 5,000 people with this project within the scope of "World Hand Washing Day"!

Private Hospital Class

In the “Special Hospital Classroom”, we aim to provide children who cannot participate in regular education processes due to their long-term treatment with valuable schooling at the hospital and at home.

● AWARDS ●

OUR AWARDS

We created an online presence for the Iznik Diabetes Camp, which is organized by The Children's Diabetes Foundation every year, and a corresponding Instagram page "My Friend Diabetes Online Camp"; we are proud to announce that we received the Felis "success" Award in the field of healthcare in the Social Responsibility and Sustainability category.

Center of Excellence olmaktan gurur duyuyoruz.

"Koç University's Department of General Surgery (Endocrine Surgery sub-category) has been awarded the title "Center of Excellence" in line with the criteria established by the European Society of Endocrine Surgeons (ESES)."
